Software Developer with experience in Java and Spring Boot, currently in the final semester of a Systems Engineering degree at Universidad del Tolima. Experienced in building microservices, developing and integrating REST APIs, database modeling and access, and deploying applications in cloud environments using AWS services such as EC2, RDS, and Lambda. Experience in full-stack projects with Angular, maintaining a comprehensive understanding of software development and applying software engineering best practices and agile methodologies such as Scrum.

Experience

Academic Tutor

University of Tolima

Ibagué, Hybrid

March 2025 – present

- Mentored Systems Engineering students in programming and advanced object-oriented programming courses, supporting the development of final academic projects.
- Strengthened students' understanding of advanced OOP concepts, MVC architecture, and full stack web development.
- Provided support through both individual and group sessions, improving academic performance and knowledge retention.

Java Developer

Digital Space

Ibagué, Hybrid

August 2024 – December 2024

- Developed microservices following hexagonal and layered architectures, implementing unit and integration testing, stateless sessions, and authentication/authorization through Kong Gateway using JWT and OAuth2.
- Collaborated in teams using Git for version control, branch management, and code reviews.
- Developed new features and performed changes on existing Spring Boot microservices.
- Created user stories and use cases, and documented APIs using Swagger.
- Developed solutions in Oracle APEX for an appointment scheduling application, writing efficient PL/SQL code, triggers, procedures, and views to optimize data processing and information filtering.
- Provided testing support and ensured software quality throughout development cycles.
- Delivered private technical training sessions to company members and clients.

Education

Bachelor's Degree in Systems Engineering

University of Tolima

GPA: 4.5

Ibagué, Tolima

Sept 2022, Feb 2027

Associate Degree in Business Management

SENA

GPA: 4.5

Ibagué, Tolima

Feb 2019 – Mar 2021

Personal Projects

- Reservation platform for a travel agency built with Angular and Spring Boot. Implements role-based authentication, a dynamic administrative panel, online payments integration with PayU, deployment on AWS EC2, and CI/CD automation with GitHub Actions. AI Chatbot implemented with RAG, embeddings, tools and Opentelemetry monitoring
- Web-based loan and collections platform developed with Java and Spring Boot. Includes credit management, professional reporting, real-time dashboards, automatic PDF generation, monitoring with Prometheus/Grafana, and deployment using Docker and PostgreSQL.

Additional Education

Oracle Next Education F2 T6 Back-end

Oracle ONE student certification with specialization in Java and Spring Boot backend development.

CS50x Introduction to Computer Science (MooC)

Harvard University, algorithms, data structures, memory allocation in C, SQL

Skills

- RESTful and SOAP API development with Spring Boot, SPA and SSR full stack applications.
- Relational databases: PostgreSQL, MySQL, Oracle Database.
- Cloud: Basic knowledge of AWS EC2, S3, Lambda, RDS, SES, and Linux server administration.
- Languages and frameworks: Java, TypeScript, PL/SQL, Tailwind CSS, Angular, Spring Boot.
- Authentication and authorization: Keycloak, OAuth2.
- Collaborative work methodologies: Git, Scrum.
- Data processing and visualization with Power BI, CI/CD with GitHub Actions

Languages

- Conversational English (B2)
- Spanish native
